OBJECTIVE

Motivated and detail-oriented Full-Stack Developer with strong expertise in front-end and back-end technologies, including Next.js, Supabase, and TypeScript. Passionate about building scalable applications and delivering seamless user experiences. Seeking to leverage my skills in a challenging position to contribute to innovative projects and collaborate with dynamic teams.

EXPERIENCE

Full-Stack Website Developer   **Oct. 2022 – Jan. 2023**
Upwork Global Inc.   *San Francisco, CA*

- Collaborating with team members to define project goals and objectives.
- Implementing responsive web design principles to ensure compatibility across various devices screen.
- Upgraded the user interface by optimizing HTML and CSS and making the application dynamic with JavaScript, which improved the user experience with the application by 40%.

Junior Front-End   **Oct. 2024 – Dec. 2024**
COVO   *Remotely*

- Developed and maintained responsive web applications using Next.js 14 and Tailwind CSS, focusing on performance optimization and user experience
- Collaborated with UI/UX designers to implement pixel-perfect interfaces and ensure cross-browser compatibility
- Implemented state management solutions and API integrations, resulting in improved data flow and reduced loading times by 30%

Junior Front-End   **Dec. 2024 – Present**
Ramses International LLC   *El Maadi - Cairo*

- Worked on the front-end team developing a super app using React Native, implementing Redux for state management and MQTT for real-time communication with the backend.
- Optimized performance, ensured smooth API integration, and collaborated with backend developers to enhance app responsiveness and stability across Android and iOS platforms.

PROJECTS (FOR MORE PROJECTS VISIT GITHUB)

TARAB | *Next.JS 14, supabase, Tailwind CSS, YouTube API*   **TARAB.app**

- Developed a full-stack music streaming application using Next.js, Supabase, Tailwind CSS, and the YouTube API.

Hosting a Full-Stack Application | *CircleCI, Elastic Beanstalk, RDS, S3*

- Hosted a full-stack application using CircleCI, AWS Elastic Beanstalk, Amazon Relational Database Service, and Amazon Simple Storage Service.

Build A Storefront Backend | *TypeScript, Express, PostgreSQL, Database Migration, .env*

- Build a storefront backend for a small company using TypeScript, JavaScript, Express, SQL, PostgreSQL, Database Migration, and Dotenv.
